SYNOPSIS

Across the industry, we are suffering from increasingly **sophisticated cyber threats** and are battling to demonstrate compliance and control.

On top, it's a **fierce market** trying to attract, train and retain the top cyber security professionals, and many companies like yours are applying **intelligent automation** to overcome this.

As attacks become more sophisticated and complex, and organisations' security stacks mature, many organisations have adopted separate micro-automation for phishing, alert management, and intel lookup/management, which has led to a fragmented and inefficient approach to SecOps.

What if you could combine your existing security stack into a single pane of glass? Or even having a centralized platform to automate workflows, playbooks, and response process'? Participants will discuss how to extract greater value from their existing tech stack without adding more staff and resources, while having an easy way of demonstrating compliance.

Does this sound too good to be true?

Security automation allows us to apply your expertise where it really counts – actively hunting and neutralizing advanced attacks. Join us to debate the ways to liberate your time.

KEY POINTS OF DISCUSSION

In a digital age of advancing cyber threats, businesses are aiming for a no-compromise approach to security controls. Your evening will bring together the IT security leaders of Germany to unpick how to build their companies resilience.

Key topics of debate:

- How to maintain & increase visibility
- How can we heighten security whilst reducing the complexity of your tech stack?
- How can businesses capitalise best on automation technology?
- How can we demonstrate ROI on automation technologies?
- What does automation mean for human controls?
- How can you demonstrate and generate compliance reporting faster?

Germany

YOUR EVENING'S EXPERT SPEAKER

Michael Lyborg, CISO, Swimlane

Michael Lyborg is the **Senior Vice President of Global Security & Enterprise IT at Swimlane**. Prior to taking his current role, Michael was Global Vice President of Advisory services, a highly sought-after expert by the world's largest Fortune 500 companies & global government agencies to advise on the creation & operation of industry leading security operations programs in North America, Europe, Australia, the Middle East, & Asia.

Before joining Swimlane, **Michael was a head of security** for the Fortune 100 **fastest growing pharmaceutical company Heska (HSKA)**, where he held multiple responsibilities for global security operations, engineering, & compliance. His roles at Swimlane & Heska built on decorated US Marine Special Operations career supporting both cyber & physical response & the mitigation of emerging threats.

Your Swimlane Hosts:

- Michael Lyborg, CISO
- Toby Van de Grift, Vice President EMEA
- Michael Frost Ugilt, Sales Director Nordics

PAST REVIEW OF SWIMLANE'S EXCELLENCE IN SECURITY AUTOMATION DINNER

Security Director, 3Shape

An evening well spent with peers in the field & hearing their thoughts on security, plus the food was excellent.
